A person wearing a dark hoodie is sitting at a desk, looking at a laptop. The background is dark with various cybersecurity terms and icons in a light green, distressed font. The terms include PHISHING, BOTNET, SPAM, HACKER, MALWARE, DDOS, VIRUS, KEYLOGGER, and SPYWARE. There are also icons for a magnifying glass, a speech bubble, a Wi-Fi signal, a padlock, gears, and a bomb. The text 'PERO, PERO, PERO' and '¿¿Qué me estás contando??' is overlaid on the person's face in a white, bold font.

The Intruders

Hacked by Prosox

Expect the legends, We are : Kuroi'SH - IrBl00d - Prosox - Sys GhosT - Tunisian Cracker -

Now I think i can leave defacing & focus on the real hacking. But if I had something to say/spread:

We've seen and noticed that, we're manipulated and hypnotised by medias. My message would be to believe only yourself.

For example, to bully the Muslims (I am not A Muslim, here is the truth, i'm just understanding the truth) for what they didn't do

Isn't normal, entering in the game of the terrorists, the ones who are the real killers (Israel, a conspiracy created by some corrupt agencies and governements to help them controlling the world), or united states governement

(for example did you ask yourself why did united states help israle or kill Hussain ?), entering in their game, (they have medias in their hand), believe those medias, and then rejecting thd fault over the wrong people...

Being a good tool, hypnotised, thinking he's free, is a hiddien and a not wanted terrorism, because this is what the terrorism wants.

Conclusion: stupidity leads to terrorism, but no one is preventing you to get your own opinion on the subject...

It is a great moment to die

Rent-A-Hacker

Experienced hacker offering his services!
 (Illegal) Hacking and social engineering is my business since i was 16 years old. I never had a real job, so i had the time to get really good at hacking and i made a good amount of money last +-20 years.
 I have worked for other people before, now i am also offering my services for everyone with enough cash here.

Prices:
 I am not doing this to make a few bucks here and there, i am not from some crappy eastern europe country and happy to scam people for 50 EUR.
 I am a professional computer expert who could earn 50-100 EUR an hour with a legal job.
 So stop reading if you don't have a serious problem worth spending some cash at.
 Prices depend a lot on the problem you want me to solve, but minimum amount for smaller jobs is 250 EUR.
 You can pay me anonymously using Bitcoin.

Technical skills:

- Web (HTML, PHP, SQL, APACHE)
- C/C++, Assembler, Delphi
- 0day Exploits, Highly personalized trojans, Bots, DDOS
- Spear Phishing Attacks to get accounts from selected targets
- Basically anything a hacker needs to be successful, if i don't know it, i'll learn it very fast
- Anonymity: no one will ever find out who i am or anything about my clients.

Social Engineering skills:

- Very good written and spoken (phone calls) english, spanish and german.
- If i can't hack something technically i'll make phone calls or write emails to the target to get the needed information, i have had people make things you wouldn't believe really often.
- A lot of experience with security practices inside big corporations.

What i'll do:
 I will do anything for money, i'm not a pussy. If you want me to destroy some business or a persons life, i'll do it!
 Some examples:

- Simply hacking something technically
- Causing alot of technical trouble on websites / networks to disrupt their service with DDOS and other methods.
- Economic espionage
- Getting private information from someone
- Ruining your opponents, business or private persons you don't like, i can ruin them financially and or get them arrested, whatever you like.

If you want someone to get known as a child porn user, no problem.

The following prices are estimates, if i think a specific job takes more time and money i will either refund you or you will send the remaining once we talked.

If you are unsure about which category to choose, choose the lower priced one in question.

You will only pay for successful jobs, if i can not do anything for you i will refund you. But keep in mind depending on your target specific things might take longer and require an addition payment, but only after i can show some success.

Product	Price	Quantity
Small job, for example: Email and Facebook hacking, installing trojans, small DDOS	250 EUR = 0.02752 ₿	<input type="text" value="1"/> X Buy now
Medium-large job, ruining people, espionage, website hacking, DDOS for big websites	500 EUR = 0.05505 ₿	<input type="text" value="1"/> X Buy now
Large job which takes a few days or multiple smaller jobs, DDOS for protected sites	900 EUR = 0.09909 ₿	<input type="text" value="1"/> X Buy now
UPGRADE: INSTANT reply within 30-60 minutes instead of 24-36 hours for urgent cases. If i need longer this will get refunded. Only buy this together with one of the other options.	200 EUR = 0.02202 ₿	<input type="text" value="1"/> X Buy now
